Making Numbers Real!

A general introduction to Numicon in an elementary school with a focus on upper elementary.

Date: Saturday 7 December 2019

Time: 09:00 - 16:00

Location: SRS School (South Building)

International School of Düsseldorf, Niederrheinstr, 336, 40489, Germany

Abstract

This engaging interactive full day workshop is designed as a general introduction to Numicon. It will be accessible to all teachers involved with teaching mathematics. It will help teachers enhance and apply best practice routines within their own classrooms settings which in turn will help their students thrive in a new world.

There will be videos and samples of Numicon in action in our classrooms at ISD and all sessions will explicitly link underlying theory and pedagogy of elementary maths to the philosophy and practice of maths as espoused by Numicon and the PYP. The teacher will have time to be the student and have time to play and discover Numicon in an interactive way to further solidify an understanding of how Numicon works, and its various possibilities in all the domains of mathematics.

Feedback from a previous numicon introductory workshops:

"I appreciate Numicon so much more now, having seen how it ties to the holistic approach of how we do maths."

"This was the best PD I have ever been to! And I've been a teacher for more than 20 years!"

"Excellent!! Time just flew by... it was fast paced, infectious and inspiring. Thank you!!"

"It's incredible how much children can learn through playing with these!"

"I love how you linked the ideas to the latest brain research, Numicon is not only fun but also the best way for children to learn."

"Versatility and simplicity combined elegantly. Great workshop, thanks!"

"Your humour and flexibility meant even greater engagement for us participants."

"Everything was great! In particular having a presenter who is clearly so passionate about the content."

"I used to be quite fearful of maths in the past. Now I feel so much more confident. Thank you!"

Join us on 7 December 2019!!
