

## Numicon Accredited Trainer | PYP Schools

**David Lyttle** has been accredited by **Oxford University Press** to offer *Numicon* Professional Development to schools around Europe. David has particular expertise in the **Primary Years Programme** of the International Baccalaureate and in **intervention strategies** for Primary Mathematics.

David can offer the following Professional Development packages for *Numicon*, all tailored to the needs of your school:

- Introductory workshops for teachers and parents
- Implementing *Numicon* in your school
- Intervention Strategies with *Numicon*
- Sustained support with *Numicon* (for schools using *Numicon*)

**Please contact David directly for details. David is based at the International School of Düsseldorf in Germany, an IB World School.**

**Work Tel: +49 (0)211 9406 708**

**Mobile: +49 (0)152 0204 7240**

**Email: [lyttled@isdedu.de](mailto:lyttled@isdedu.de)**

David joined the team at the International School of Düsseldorf in 2012. Since then, he has put his expertise in Primary School Mathematics to good use developing a successful math intervention program using *Numicon* resources. He has also provided modeling and teaching workshops to PYP teachers, and runs the math screening and diagnostic assessment program for the elementary school. David has recently completed a Masters of Inclusion Education with a strong focus on Math difficulties, prevention and intervention, and support for gifted and talented students.

David is a strong advocate for *Numicon* and its overall utility as part of any math program. He has received strong positive feedback for seminars introducing *Numicon* to the ISD community. One teacher comments, the presentation “opened me up a new world of possibilities in Elementary Maths, thank you!”

David can customize his support to cater for your school’s specific needs, and is happy to offer workshops, seminars, on-going consultancy, modelled lessons and classroom observations.

For further information on *Numicon* resources please see [www.oxfordprimary.com](http://www.oxfordprimary.com)
